

Cycle Count Scanner

how it works

SportsMed Toolbox

Get into the app

- 1 On your iPhone, open **sportsmedtoolbox.com** in Safari. Site password: **SYKsports2026**.
- 2 Add it to your home screen: tap the Share icon, then **Add to Home Screen**. It opens full screen and keeps working with no signal.
- 3 From the home screen, tap the gold **Inventory Management** card at the bottom.

Join your team (once per phone)

- 1 Pick your territory from the list — the search box narrows it fast.
- 2 Enter your team password. Get it from whoever runs your territory.
- 3 Pick **your** phone from the list, then tap Continue. Every scan from your phone lands on your own tab of the team sheet — pick the right one.
- 4 That is the whole setup. The phone remembers both choices.

Start a new territory

- 1 Tap the gold **New Territory** button instead.
- 2 Your name and Gmail (no Stryker emails), a territory name, and a team password. Add teammates now or any time later.
- 3 Tap Done — the app builds your team's Google Sheet, shares it to every Gmail, and drops you straight into your new territory.

The ? button on the territory list opens this guide.

Tap the gold Inventory Management card, then pick your territory.

Enter the team password, then pick your phone. One unlock per phone — the list comes from your team's roster.

New Territory signup. Everyone gets edit access, and each phone gets its own tab.

Run a count

Before you start: tap **Check for updates** on the home screen so every phone is counting on the same version.

- 1 Tap **Cycle Count**. Locations you have already counted show as cards — open one to keep adding to it, or tap **Start new count** for a fresh location.
- 2 Type the **Location** (Trunk, Storage Unit, a surgery center). **Sub-location** and **Notes** are optional — use sub-location for bins and shelves. Then tap **Start Scanning**.

RFT Best Practice

We use Sub-location to indicate specific shelf or location within a storage unit to aide in error checks. We also start a new count for each sub-location so that no batch gets too large in case of a system crash or unanticipated error.

Scanning

- 1 Point the frame at the package barcode. Each scan adds a line, and scanning the same item again bumps its quantity.
- 2 Tap a line's quantity to correct it — a stepper opens, and **Delete line** removes it entirely.
- 3 + **Manual** adds an item by typing the REF when a barcode will not read — lot and a quantity stepper included. **Camera off** saves battery while you move between shelves. **End** closes the count — you can reopen the location any time to keep going.

Start a count. Locations you have used before autofill as you type.

Scan screen: frame up top, the location's lines below, quantities on the right.

Syncing

- 1 Every scan saves on the phone the moment it happens. Nothing is lost if you lose signal or close the app mid-count.
- 2 **Saved** ✓ means the team Google spreadsheet has everything from this phone. **Syncing...** or a queued pill means no signal — the scans send themselves as soon as signal returns. No button to press.
- 3 Do not change your device pick while scans are queued; the app will stop you until they finish sending.

The sync pill sits above the count lines: Saved ✓, Syncing..., or the number still queued.

The team sheet

Each territory has its own Google Sheet, shared automatically to every teammate's Gmail the moment they are added. The tabs:

Your phone's tab — the raw lines you scanned: timestamp, location, REF, description, lot, expiration, quantity.

_Master — the first tab. Every phone's lines stacked into one live view of the whole territory. It rebuilds itself as the team changes.

There is no Devices tab on new territories — phones and people are managed in the app (next page).

Manual add: REF, lot, and a quantity stepper.

Tap a quantity to fix it — or delete the line.

The team sheet, continued

A1	Timestamp										
	A	B	C	D	E	F	G	H	I	J	K
1	Timestamp	Device	Location	Ref	Description	Family	Lot	Exp	Expired	Qty	Notes
2	2026-08-24T17:00	Sy's iPhone	Trunk — Bin 1	00CAT01858	NanoTack Force	NanoTack suture	25158AE2			4	
3	2026-08-24T17:00	Sy's iPhone	Trunk — Bin 1	00CAT01386	NanoTack Force	NanoTack suture	25127AG2			2	
4	2026-08-24T17:00	Sy's iPhone	Storage Unit —	0130	InSpace	InSpace balloon	240724-03			1	
5											

A device tab. One row per item per location — lots and REFs stay exactly as scanned.

A1	Timestamp										
	A	B	C	D	E	F	G	H	I	J	K
1	Timestamp	Device	Location	Ref	Description	Family	Lot	Exp	Expired	Qty	Notes
2	2026-08-24T17:00	Sy's iPhone	Trunk — Bin 1	00CAT01858	NanoTack Force	NanoTack suture	25158AE2			4	
3	2026-08-24T17:00	Sy's iPhone	Trunk — Bin 1	00CAT01386	NanoTack Force	NanoTack suture	25127AG2			2	
4	2026-08-24T17:00	Sy's iPhone	Storage Unit —	0130	InSpace	InSpace balloon	240724-03			1	
5											

_Master: the whole team in one live view.

+	≡	_Master ▾	Jordan's iPhone ▾	Mia's iPhone ▾	Sy's iPhone ▾
---	---	-----------	-------------------	----------------	---------------

The tabs sit along the bottom of the sheet — _Master first, then one tab per phone.

Manage your team (in the app)

Open your territory and tap **Manage this team**, then enter the team password. From there you can rename the territory, change the password, **add a teammate** (their tab is created and the sheet is shared to their Gmail on the spot), **fix** a name, or **remove** someone — their tab and scans stay on the sheet, but their access to it is revoked. If they should not get back into the app either, change the team password too.

Quick answers

Wrong quantity on a line?

Open the location, tap the quantity, fix it. The sheet updates.

New phone or new rep?

Manage this team → Add a teammate. Their tab and sheet access appear on their Gmail immediately. (Original six territories: add the phone on the sheet's Devices tab instead.)

Forgot the team password?

Whoever created the territory has it — every password change is mailed to the ToolBox account, so Nate can always dig it out.

App looks out of date?

Home → Check for updates.

Your team hub: your device, a change link, and Manage this team.

Manage: territory name, password, and the team list.
